Vigatron Project Registration Policy

Project registration is open only to authorized Vigatron resellers working on projects in the United States of America or Canada. Authorized distributors must name the deal that the project will be applied to and name the same dealer on the submitted purchase order with the approved discount. Project registration discounts will only be applied to the named dealer and are not transferable. While in many cases, the project in question will be opened to other parties, the filling of a project registration by no means restricts the ability of other parties, either authorized by Vigatron or acting in accordance with a Vigatron authorized sales agency, from contacting or selling Vigatron products to the purchasing party.

The filling of a project registration by no means restricts Vigatron from interacting with any other party inquiring as to the nature of the same project or interacting with the same customer. Vigatron will not knowingly use the information provided for the project registration to make public, neither the nature of the project nor the connection, between a specific project and the end user.

Project registrations are valid for a period of six months. Registrants may elect to re-file once the period has lapsed and may continue to do so. The first party to register a project and have it accepted by Vigatron will be considered as the primary party. After which, other authorized Vigatron resellers will not be considered for the same status while the registration period is in effect at the discretion of Vigatron.

The filling of the product registration form, if approved by Vigatron, may result in a specific discount to the applicant at Vigatron's sole discretion. However, acceptance of the product registration form by Vigatron does not, in any way or method, provide the applicant with an advantage over other authorized Vigatron resellers or affects the right of the end user to exercise their fair and legal business conduct with regards to the individual purchase or interaction with Vigatron. Where called for and in compliance with fair trade practices, Vigatron may apply other sales methods and discounts in addition to and in conjunction with this application. The acceptance of the product registration form will not restrict Vigatron from providing the same discount to other authorized Vigatron sales channels.

In order for the application to be accepted, the following conditions must be met:

1. Project registration form must be filled out completely, no exceptions.
2. The form must be filed in a period of no more than 30 days from receipt of purchase order and/or the date of issuance as contained on the purchase order.
3. The form must be submitted via Vigatron's website, via email, or by other services, such that a record by means of physical copy can be obtained and retained by Vigatron.
4. The date of receipt shall be considered as the date of filling.
5. The project location must be inside United States or Canada.
6. An incomplete form will not be accepted, counted, or otherwise considered as the date of submission.
7. To qualify for project registration, the received order must be at least \$5,000 after the 5% discount is applied.
8. Distribution filing for project registration must name the dealer it will be applied to. The discount will only apply to the named dealer.
